

MAINTENANCE PLAN

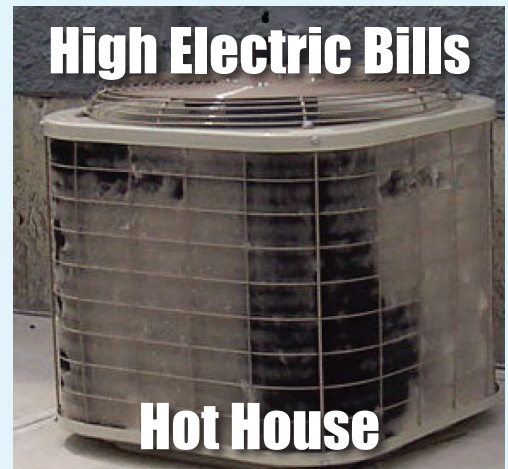

www.coomesair.com

If your air conditioner were a car, every year you would drive it **49,680 miles!**

When was the last time you had your air conditioning system serviced?

Your air conditioner is a mechanical system, the same as your car. It needs periodic service and maintenance. Neglect your air conditioner and it will run less efficiently (just like your car) causing more expensive utility bills. Neglect your air conditioner long enough and it will eventually break down (just like your car). While you won't be stranded by the side of the road, you will be stranded in a hot house. Since utility research studies show that the energy savings from an A/C tune-up is more than the cost of the service, you might as well get it done.

Benefits of a Coomes Air Maintenance Plan include:

- *2 Pres-Season Mechanical tune-ups and cleanings* (one in spring and fall)
- *Air filters included*
- *Lower utility bills*
- *Fewer break downs during the peak seasons*
- *No overtime rates*
- *15% discount on any repairs needed*
- *Satisfy equipment manufacturer requirement for warranty*
- *No diagnostic or dispatch fees should a breakdown occur*

Get Your System Serviced

\$19.95 a month for 1 system

\$10.00 a month for each additional system
